

How To Save Your Pressure Washer Pump

PUMP

The manufacturer recommends using a pump protector/winterizer, such as EXA80, when storing the unit for more than 30 days and/or when freezing temperatures are expected. If a pump protector/winterizer is not available, *RV antifreeze needs to be run through the pump as outlined in the steps below. **NOTE:** Using a pump protector/winterizer or *RV antifreeze is to provide proper lubrication to the internal seals of the pump regardless of temperature or environment.

- 1. Obtain a funnel, six ounces of *RV antifreeze, and 16 - 36 inches of garden hose with a male hose connector attached to one end.**
